Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lalonde et al. (US 6283959) further in view of Benson (US 4082096). Lalonde et al. disclose a device for cryoablating exposed tissue comprising a tube-shaped shaft (10), a flexible enclosure (203) and a means for cooling (201) the enclosure to cryoablate tissue. Lalonde et al. '959 teach all of the limitations of the claims except a shapeable element attached to the distal end of the shaft and extending therefrom into the cryochamber. Benson discloses a cryoablation device that includes a shapeable element that helps to maintain the desired configuration of the tip and provide a means of pressing the probe tip into engagement with tissues. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a shapeable element on the Lalonde et al. device as taught by Benson to help maintain the desired configuration of the tip.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chin (US 5449380) discloses an apparatus for organ ablation that includes a flexible enclosure (10) and a shapeable element (52). Lalonde (US

6602247) discloses an apparatus for cryoablation that includes a flexible enclosure (2445) and a shapeable element (1410).
